

# ROHITH M

+91-8921171060 | [rohithmemail@gmail.com](mailto:rohithmemail@gmail.com) | [LinkedIn](#) | [Portfolio](#)

## EDUCATION

Amrita Vishwa Vidyapeetham, Coimbatore  
Bachelor of Technology, Computer Science & Engineering

2021 - Present  
CGPA: 8.42

Bharatiya Vidya Bhavan, Thrissur  
Higher Secondary

2019 - 2021  
CBSE: 95.4%

## EXPERIENCE

**SAP | Invoice Extraction with GenAI** | [GitHub Link](#)

February 2024 – April 2024  
Remote

Front End Developer | React

- Designed and developed responsive UI pages in React for login, uploading/auto-filling, profile management, invoice status tracking and manager dashboard.

## PROJECTS

**Fake News Detection** | Machine Learning | React | Flask | [GitHub Link](#)

- Developed a real-time fake news detection system using Flask for the backend and React for the frontend.
- Pre-processed the dataset with text normalization techniques, including tokenization, stemming, stop word removal and TF-IDF vectorization to improve the accuracy of the machine learning models.
- Implemented machine learning models, including Logistic Regression, Decision Tree, and Random Forest, achieving over 98% testing accuracy.

**Interactive Text-to-Image Bot** | React | Flask | Hugging Face API | [GitHub Link](#)

- Implemented an interactive text-to-image bot using Flask for backend services and React for the user interface.
- Integrated Hugging Face's Stable Diffusion model, achieving an average image generation time of under 5 seconds per request.
- Designed and implemented RESTful APIs for smooth communication between frontend and backend, ensuring a responsive user experience.

**Spelling Checker** | Python | Trie | Hashing | SQLite | React | Flask | [GitHub Link](#)

- Developed a spelling checker and auto-completion system using Trie and hash table for word validation.
- Implemented a spelling suggestion system offering up to 5 relevant corrections, enhancing user experience.
- Designed a reliable hashing mechanism and utilized SQLite to store and track misspelled words and their frequencies, enabling historical analysis and improving accuracy.

## SKILLS

- Areas of Interest:** Object Oriented Programming, Database Management System
- Languages:** Python, C++, C, Java, HTML, CSS, JavaScript, SQL
- Tools & Technologies:** VS Code, Jira, Git, GitHub, Google Colab, Wireshark, Canva

## ACHIEVEMENTS / EXTRACURRICULAR ACTIVITIES

- Google | Crash Course on Python | Course Completion Certificate | [Link](#)
- HackerRank | Python (Basic) | Assessment Certificate | [Link](#)
- Linkedin | Learning SQL Programming | Course Completion Certificate | [Link](#)
- Content & Social Media Manager Intern | Life Education Institute | [Link](#)
- Digital Poster Making Competition | FIT INDIA WEEK-2023 | First Place | [Link](#)
- Football Player | Played for CSE department
